ACTIVE DIAGNOSES

Cervical myelopathy w/ radiculopathy

Lumbar radiculopathy

Sensorimotor axonal neuropathy

HEADLINE INSIGHT

Two coexisting pathologies

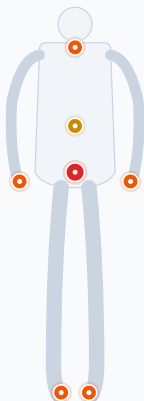

Structural compression from advanced spondylosis, layered over sensorimotor axonal neuropathy of likely metabolic origin. Both require independent treatment.

## OPEN CLINICAL QUESTIONS

## FLAG IF RELEVANT

- 1 Dominant driver of neuropathy: HbA1c or B-12? Counselling indicated pre-epidural?
- 2 Prior 2014 cervical MRI in case file for C5 cord-signal comparison?
- 3 Pain-CBT referral given 1-year chronicity + stressors+?
- 4 Data hygiene: prescription records 79 y; MRI records 77 y. Reconcile in EMR.
